

## Regional Mathematical Olympiad – 2023

Time: 3 hours

October 29, 2023

### Instructions

- Calculators (in any form) and protractors are not allowed.
- Rulers and compasses are allowed.
- Answer all the questions.
- All questions carry equal marks. Maximum marks: 102.
- Answer to each question should start on a new page. Clearly indicate the question number.

1. Let  $N$  be the set of all positive integers and  
Find the largest positive integer  $m$  such that  $m$  divides \_\_\_\_\_ for all \_\_\_\_\_
  
2. Let \_\_\_\_\_ be a semicircle with \_\_\_\_\_ as the bounding diameter and let  $CD$  be a variable chord of the semicircle of constant length such that \_\_\_\_\_ lie in the interior of the arc \_\_\_\_\_. Let  $E$  be a point on the diameter \_\_\_\_\_ such that \_\_\_\_\_ are equally inclined to the line \_\_\_\_\_. Prove that:
  - (a) The measure of \_\_\_\_\_ is a constant.
  - (b) The circumcircle of triangle \_\_\_\_\_ passes through a fixed point.
  
3. For any natural number  $n$ , expressed in base 10, let  $s(n)$  denote the sum of all its digits. Find all natural numbers  $m$  and  $n$  such that  $m < n$  and  
\_\_\_\_\_ and \_\_\_\_\_.
  
4. Let \_\_\_\_\_ be two intersecting circles with centres \_\_\_\_\_ respectively. Let \_\_\_\_\_ be a line that intersects \_\_\_\_\_ at points \_\_\_\_\_ and \_\_\_\_\_ at points \_\_\_\_\_ such that \_\_\_\_\_ are collinear in that order. Let the perpendicular bisector of segment \_\_\_\_\_ intersect \_\_\_\_\_ at points \_\_\_\_\_ and the perpendicular bisector of segment \_\_\_\_\_ intersect \_\_\_\_\_ at point \_\_\_\_\_ such that \_\_\_\_\_ are on the same side of \_\_\_\_\_. Prove that the midpoint of \_\_\_\_\_ and \_\_\_\_\_ are collinear.
  
5. Let \_\_\_\_\_ be positive integers. Determine all positive real numbers \_\_\_\_\_ which satisfy \_\_\_\_\_
  
6. Consider a set of 16 points arranged in a \_\_\_\_\_ square grid formation. Prove that if any 7 of these points are coloured blue, then there exists an isosceles right-angled triangle whose vertices are all blue.
